

[TRANSCIVER MODULE WITH A CLIPPING DEVICE USED IN AN OPTICAL FIBER COMMUNICATIONS SYSTEM]

Abstract of Disclosure

A transceiver module is used in an optical fiber communications system. The optical fiber communications system includes a housing, a connector for connecting with the housing, an optical sub assembly (OSA) installed within the connector for receiving or emitting optical signals, a printed circuit board (PCB) installed within the housing for processing photoelectric signals, and a clipping device disposed within the housing for fixing the OSA so that the OSA is electrically connected with the PCB.
